Reimagining Career Semiotics toward Application Efficiencies and Programmable Efficacies: A Phenomenological Analysis

David Paul Dean

De Forest University

FORMAT CHECKLIST

- Title Page Header:** "Running head:" followed by a short title in all capital letters
- Page Number:** Page numbers are flush right at the top of the page
- Title:** Centered left to right, double spaced in the upper half of the page
- Author's Name:** Your name, double spaced and centered
- Institutional Name:** School name, double spaced and centered

SAMPLE RESEARCH PAPER: ABSTRACT

REIMAGINING CAREER SEMIOTICS 2

Abstract

Career-based disparate pairings interview analysis techniques coupled with descriptive consciences descriptive analysis employing genitive epistemological pairings are integrated with interviews of students successfully seeking career residual rectification of promotable improvements. These are associatively tracked with employable knowledge, skills, aptitudes, abilities, and with multiple psychotechnic intelligences.

Results indicate further research is needed to support advances toward these

FORMAT CHECKLIST

- The Abstract:** The abstract appears on a separate page. *Check with your professor to see if this is required for your class.*
- Running Header:** Short title in all capital letters
- The word "Abstract" is capitalized, centered and not bolded
- The first line is **not** indented. Subsequent paragraphs should be indented.

SAMPLE RESEARCH PAPER: FIRST PAGE

Reimagining Career Semiotics toward Application Efficiencies and Programmable Efficacies: A Phenomenological Analysis

Experienced career seekers carry the commonly held perceptions of the widely regarded Saussurean tradition of signs and symbols imparting psychotomic cues related to the interview process. Amelioration of application inefficiencies and enhancement of efficacies pertaining to programmable functionalities are central tendencies of desired outcomes of complexity management, ambiguity centering, and values self-confliction (Gaylor, Hughes, and Carvajal, 2012). Traditional research approaches have remained elusive in casting the two traditional imaging cycles of patterns. This study employs a bevy of phenomenological tools designed to hone in on these angst inducing extrapolations. This study will explore why dis-associative functioning, with the onset of string pair career bindings, results in such inconsistent outcomes.

Literature Review

As Burke, Burden, & Wedes (1997) observed in their classic study; Riley modeling is highly constrained due to the simulated attitudinal annealing. However work with senior job seekers revealed meta-rhythmic cyclisation closely linked to audited intelligences (Rossi-Howrey Foundation, 2002). It was not until the Kunnapas Effect was audited that Sanders et al. realized the, “optimal compiler is as elegant as its own ambition” (2004, p. 444). Thus, the stage was smartly set for future explorations.

Limitations of the Current Study

As Ostrowski (2012), acknowledges in her je ne sais quoi post-futurist study

The Title: The full title is centered and not bolded

Paragraphs are indented 5 spaces

Paper Format:

Double-space all sections of your paper

Use a 12 point font such as Times New Roman

Have a one inch margin on the right, left, top, and bottom

Align the text to the left and leave a “ragged” right margin

Use in-text citations to cite your sources

Spell the numbers 1-9 as words, such as: one, two, four

Anything above 10 is written in numerals, such as: 11, 52, or 125

Numbers starting a sentence are written as words: Two or Twenty

Level 1 Headings: Bolded, centered, in upper and lower case

When the author is a signal phrase, put the date in parentheses

The author may be an organization

If you are quoting, include the page number in the citation

For six or more authors, use the first author's name, followed by “et al.”

Level 2 Headings: Bolded, flush left in upper and lower case

Commonly used foreign words and phrases are not italicized

List of References begins on a new page at the end of the paper

The word "References" is capitalized and centered, but not bolded

The list is doubled spaced

First line of each citation is flush left. Use the Hanging Indent in MS Word to indent subsequent lines five spaces.

Titles of book and journals are italicized.

List is arranged alphabetically by the first word of each entry—typically the surname of the lead author or the authoring organization. If there is no author the first word of the title is used (ignoring "A," "An," or "The")
